

eServGlobal secures major contract for prepaid services platform

Sydney, 4 August, 2009

eServGlobal Limited (LSE: ESG & ASX: ESV), a provider of end-to-end solutions, enabling smart communication and charging services for telecom operators on any generation network, today announced that their prepaid services platform has been selected by Two Degrees Mobile Limited.

As the newest entrant to the New Zealand telecoms sector, 2degrees is preparing to supply great value services to the New Zealand mobile communications market. eServGlobal secured the multi-million dollar contract to provide ChargingMax, its prepaid services platform, following 2degrees' satisfaction with Mailis, eServGlobal's voicemail solution.

The ChargingMax, IN-based, solution provides for a distributed architecture, thus separating billing and rating from call control, which leads to a more scalable and highly available solution. In addition, ChargingMax includes value-added services and online network control, allowing 2degrees to monitor customer usage and modify features to maximise customer satisfaction.

Eric Hertz, CEO 2degrees, said "We were impressed by the quality and efficient delivery of eServGlobal's voicemail product. ChargingMax also met our existing charging requirements, so it could be easily adapted to meet our future needs without additional outlay."

"This is another example of the continuing success of ChargingMax, the world's fastest growing charging and payment platform, which today serves over 600 million subscribers in 50 countries and is built and supported by our engineering Centre of Excellence in Wellington, New Zealand", commented Richard Mathews, CEO, eServGlobal. "We look forward to contributing to 2degrees' future success."

About 2degrees

2degrees is New Zealand's newest mobile network.

Over the past few years 2degrees has spent \$250 million constructing a mobile network so it can deliver better value mobile services for the benefit of all New Zealanders.

2degrees' promise is to put New Zealanders back in control of their mobile communications and give them the freedom to use their mobiles whenever and however they want.

About eServGlobal

eServGlobal (AIM: ESG & ASX: ESV) develops and implements solutions for mobile payment, convergent charging and rating, network services and messaging products, for telecom service providers, across all legacy and next generation telecom networks.

eServGlobal provides comprehensive services ensuring the success of projects with worldwide implementation, integration and support services. Its innovative solutions help service providers to grow new revenues, reduce churn and lower their costs.

Over 80 of the world's leading service providers, with over 400 million mobile subscribers in more than 50 countries, are taking advantage of eServGlobal's end-to-end solutions and expertise to quickly deliver revenue-generating services. With 16 offices around the world and staff from 30 different countries, it provides flexible solutions with ongoing product development, based on a deep understanding of its customers' challenges.

eServGlobal is listed on the Australian Stock Exchange (ASX: ESV) and the London Stock Exchange AIM market (LSE: ESG). In the year to 30 June 2008, eServGlobal reported revenue of AU\$177.9 million, representing organic growth of 15.9% over FY07. Net profit after tax of AU\$10.4 million was achieved, up 91.5% from the previous year. A dividend of 3 cents per share was paid for the full year ended 30 June, 2008, an increase of 50% over the previous year's dividend payment. More information can be found at: www.eservglobal.com
